

**Semo Port Loop Track Terminal (LTT) Project
(Material Handling Construction Project)
MARAD Project No. 693JF71910013**

INFORMATIONAL ANNOUNCEMENT

Informational Announcement. This is an informational announcement regarding a project to be completed at the Southeast Missouri Regional Port Authority. This will allow for potential contractors to obtain an approximately 75% set of the plans and technical and performance specifications FOR INFORMATIONAL PURPOSES ONLY for the project prior to the official release of the formal BID DOCUMENTS.

Project Description. Material Handling Facility construction at the Semo Port in Cape Girardeau and Scott Counties, Missouri. The project will consist of new terminal consisting of a rail-to-barge conveyor system for railcar unloading and product transfer and a river barge loadout terminal. The railcar unloading system consists of the railcar unloading building, soil preparations, concrete foundations, steel, chutework, feeders, conveyors, utility feeds, piping, electrical systems, instrumentation and controls systems. The barge loading system will include the installation of elevated conveyors, landside transfer towers, chutework, foundations, piles, waterside support towers, breasting dolphins, barge loadout chutes, piping, electrical systems, instrumentation and control systems

Bids Due approximately on **WEDNESDAY, July 19, 2023,** to

Southeast Missouri Regional Port Authority
10 Bill Bess Drive
Scott City, MO 63780
www.semoport.com

Mandatory Pre-Bid Conference will be held approximately on Tuesday, June 27, 2023.

Bidder must be experienced in bulk material unload and loading facilities, marine, structural construction and other work as described in the Contract Documents.

This project will be partially funded with a grant from the Maritime Administration (MARAD) and therefore is subject to the regulations associated with that program.
